Altro Transflor is exhibiting its unique and highly advanced marine flooring, Gallium – the only PVC-free, IMO MED fully-approved slip resistant, lightweight flooring on the market. Designed specifically for maritime use, Gallium is ideal for areas where slips and trips could occur, such as service corridors and emergency stairwells, helping to prevent accidents. In addition, it is safe in the event of fire because it is fully compliant with the stringent IMO FTP regulations on fire, smoke and toxicity. Altro use Lloyds Register as their notified body for MED approval. Gallium received industry recognition by winning the coveted 2008 Safety at Sea International Award in the equipment category.
Altro Transflor Gallium is easy to clean and is available in six attractive and practical colourways. Its high resistance to UV ensures excellent colour retention to keep the floor looking good. The integral bacteriostat – altrosan™ – helps prevent the build-up of bacteria and combats cross contamination.
Altro Transflor has over 30 years' experience in the transit flooring industry. Altro is leading the way in safety flooring recycling – all products are 100% recyclable and contain post consumer recycle as an integral raw material. For more information, log on to www.altrotransflor.com or call +44 (0) 1462 707600.
